

KITCHEN MEASURING GUIDE

Measure Like A Pro

Measuring is an important step, but it doesn't have to be complicated. Follow this simple guide to make sure you give your designer all the info they need to get started on your project.

You Will Need

- Tape measure 16'-25'
- Pencil
- Paper *Grid paper works best*
- Camera or phone
- Ladder or step stool
- Helper *Optional*

STEP 1

Draw the overall shape of the room, then add measurements.

- ❑ Draw room shape.
- ❑ Start in one corner and measure clockwise. Record the overall length of each wall.
- ❑ Measure the ceiling height, in several different locations. Record the lowest measurement.

STEP 2

Measure all openings & obstacles.

- ❑ Label doors & windows: A, B, C.
- ❑ Record width of each door.
Include trim as part of the door measurement.
Indicate where door leads: garage, family room, outdoors.....
- ❑ Record width of each window.
Include trim as part of the window measurement.
- ❑ Indicate locations of outlets, switches & registers.

STEP 3

Measure appliance locations.

- ❑ Record distance from wall to center of sink.
- ❑ Record distance from wall to center of each appliance. We've illustrated the range at right.
- ❑ Double check all measurements.

Kitchen Measuring Guide

STEP 5

Take Photos.

A picture is worth a thousand words. Help your designer assess the space by taking pictures of the entire space. Be sure to include pictures of each wall.

STEP 6

Scan or take a photo of your sketch & window, door, appliance details from steps 3 & 4.

Gather images of kitchens you like from Houzz, Pinterest, etc. *(In general, right-clicking on an image will give you the option to "Save Image As").* Indicate what you like about each image.

Send the above, along with the room photos from Step 5, to your designer.
